

A photograph of a female MRI technician in blue scrubs leaning over a patient lying on a table inside an MRI scanner. The scanner is a Philips model, and a control console with a monitor is visible on the right. The monitor displays a software interface with patient information and scan parameters. The scene is lit with a cool blue light.

MRI user group meeting

The Philips MRI User Group Meeting offers the platform to develop your knowledge about advanced imaging techniques, share best practice and get insights about the clinical use of MRI technology that support clinical excellence and enhance workflow and productivity.

Each meeting is CPD accredited and features presentations by respected MRI radiographers and radiologists on a range of basic and advanced MRI topics. Our aim is to encourage networking and inspire peer to peer sharing of new MR techniques and technologies.
