Philips Learning Academy APAC

The Learning Academy provides you with

- Basic and advanced trainings that accommodate your training needs and availability.
- A learning opportunity with image processing on the Intellispace Portal workstations, combined with clinical presentations and case discussions.
- A dedicated environment in which you can focus on all aspects of the training without the distractions of your workplace.
- Trainings facilitated by internationally certified instructors with verified standards of excellence in training.
- Accredited courses.

“I used the Philips Learning Academy as a venue for a SCCT Level 1 & 2 Cardiac CT course. The facilities are ideal for teaching, with ample space for workstations and a good audio-visual set up allowing easy interaction with the delegates. I am certainly looking forward to using the facilities again.”

- Dr. Ben Ariff, radiologist (MRCP, FRCR, PhD - ICRM), Imperial College NHS Trust, London

TAVR and Cardiac CTA Expert Users Course

In this course participants are offered a comprehensive hands-on training in the use of CT in the pre-TAVR assessment and will cover how to perform the various measurements crucial for TAVI sizing. The role of CT in cardiac structural work will also be explored, including the use of CT in post TAVR complications; the role of CT in the assessment of Paravalvular leaks and in the assessment of the left atrial appendage for closure devices.

Learning objectives

- Understand Coronary Graft procedures and scanning techniques
- Ability to report complex Cardiac CTA and Coronary Graft studies
- Understand TAVI procedures and valve measurements

Level 300

Audience Cardiologists & Radiologists

Facilitator Dr Lynette Teo

Dr Ben Ariff, radiologist

Dates 13-14 July 2020

Credits RANZCR - 28.75 CPD

Date

13-14 July 2020

Maximum per course

23 participants

Location

Philips APAC Center, 622
Lorong 1 Toa Payoh,
Singapore 319763
